

**Hwange Coke Ovens  
Rolling Rebuild**

**Type of project:** EPC  
**Sector:** Coke Manufacture  
**Client:** Hwange Coal & Coke Company  
**Location:** Zimbabwe  
**Technology:** Coke Oven  
**Capacity:** 32 off 4.5m ovens capable of producing 200,000 tpa of coke  
**Date:** Commenced 2011

**Overview:** The Hwange coke ovens were built in 1985 and although still operable are in a very poor state of repair. OSL have been engaged to carry out a complete hot rebuild of the ovens. Initial through-wall repairs have been undertaken successfully and is being followed by a complete rebuild over a period of 18 months whilst the plant is operational.

**Deliverables:** Turnkey project including design, procurement of equipment and materials, construction supervision, commissioning and process set-up.

**Status:** Ongoing.
